## Glassless Mirror Repair

---

### **How to Repair a Glassless Mirror Tear**

- 1** Cut beginning tab off glassless mirror repair tape.
- 2** Cut a length of repair tape slightly longer than tear.
- 3** Start at one end and gently smooth tape over tear.
- 4** Repeat step #2-4 for a tear wider than the tape or a curved tear.
- 5** Allow tape to set for 24 hours before following procedure to “How to Remove a Wrinkle from a Glassless Mirror”.

---

### **How to Remove a Wrinkle from a Glassless Mirror**

A heat gun can be used to remove wrinkles from the mirror. Hold heat gun 1” or more away from the mirror surface. Move in a circular fashion, working towards outside edge. Always keep the heat gun moving in order to avoid burning the mirror film. Excessive heating will permanently discolor the mirror film.
